

36kW Fan Heater

Energy efficient, small, portable,
versatile Electric Fan Heater suitable for any purpose

Key Features

- Two filters for consistent, high-volume air flow and lower noise level
- Improved filters with additional pre-filter in a choice of filter grades. G4 standard filter
- Metal air distributor spreads air around the room and gives 360 degree coverage and maximum throw
- The very compact chassis means that the fan units can be placed in confined spaces such as stairwells, marquees and apartments
- The lightweight design makes them easy to lift, move, transport or hang from a wall
- Accessible, modular construction
- Removable top for easy cleaning/servicing
- High temperature increase (ΔT) and large air flows for maximum energy efficiency
- Automatic cool-down extends product life
- Smart control card
- Lockable, password-protected display
- Choice of operating modes: Drying, Event, Heating
- Electronic thermostat for room temperature control

General Data

Heating Output	kW	36
Nominal Running Current	A	57
Controls	-	Electrical Thermostat
Heating Distributor	mm	Steel (removable)
Air Flow	M ³ /Hr	4650/3850
Overheating Protection	-	Yes
Power Settings	kW	18 / 36
Power Supply	V/ph/Hz	400/3/50 + N + E
Plug Type	-	63a 3ph 5pin
Weight	kg	127.5
Dimensions Inc. Distributor	mm	935 x 740 x 1200mm
Dimensions Excl. Distributor	mm	935 x 740 x 2150mm
Protection Rating	-	IP44

Our Hire fleet also includes:

3kW Heater Fan

9kW Heater Fan

18kW Heater Fan
